New Video System Update:

April 7, 2021

The new video system is now being used to record the services. The system operates great. The camera picture is really nice. Our first goal is to be able to post the video on the website without any editing. We are almost there. The next goal is to find out what it takes to live stream the service, once we are back in the church.

Feb 22, 2021

The new Video recording system, purchased and installed by Excel AV Group, is installed and operational. It will be phased into recording the church services.

Marshall Hoff, Mick Peterson and Tom Schneiberg received training on the system from Excel AV Group engineer and are ready to use it. Additional people interested in learning how to use the system are welcome and can receive training.
